

MVI

MVI - FREE OSCILLATION VIBRATING SCREEN

The vibrating screen series are designed for dry and wet sizing and rinsing of the materials in a wide range of applications.

All the machines are currently fitted with standard metal meshes, meshes fastening system with metallic profile and rubber profile for meshes support.

The vibrating frame is made of reinforced and

electro-welded parts to resist to the stresses generated by the significant accelerations to which the machine is subjected.

The main screen structure is placed on supporting springs system with high flexibility.

The machine is normally equipped with transmission composed by electric motor, belts and pulleys.

Model	Capacity (t/h)	Power (kw) 2 decks	Power (kw) 3 decks	Power (kw) 4 decks
MVI-150-400	50-150	7,5	11	11
MVI-150-500	50-200	11	15	15
MVI-180-500	50-280	18,5	18,5	18,5
MVI-180-600	50-330	22	18,5	18,5
MVI-210-600	100-330	18,5	22	30
MVI-210-700	100-330	22	30	37
MVI-240-600	100-380	37	45	55
MVI-240-700	120-380	37	45	-
MVI-240-800	140-450	45	55	-

APPLICATIONS

Aggregates

Recycling

Industrial sands
